

Toopy and Binoo

Toopy and Binoo's Fruity Dominoes

Set up the game...

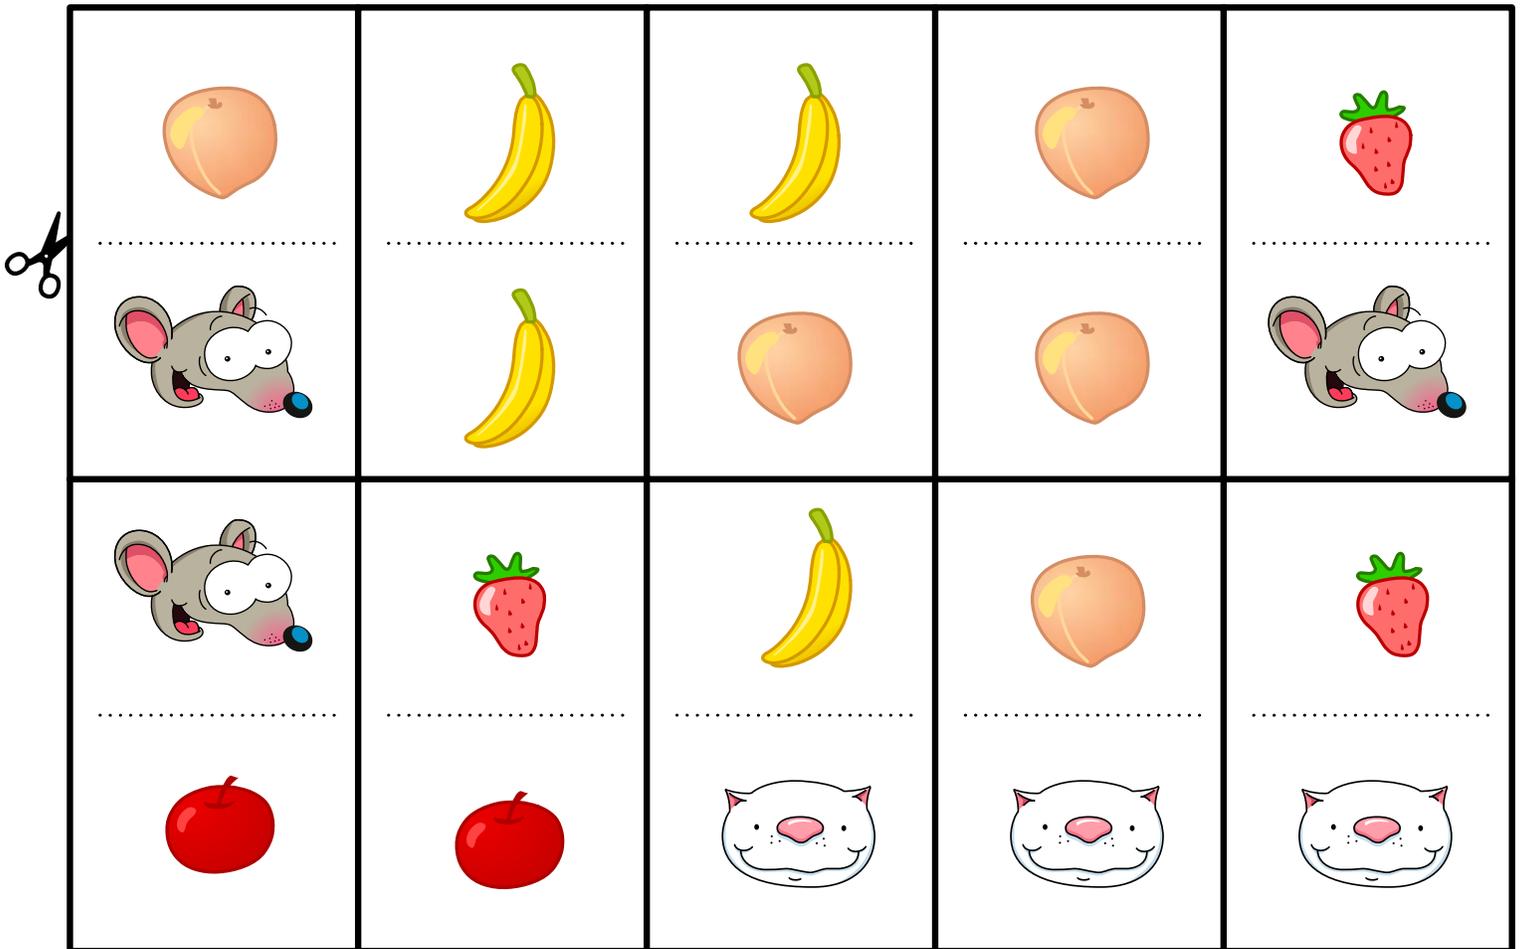

Ask a grown-up to give you a hand.

- Cut out the dominoes on the black lines
- You will have 29 dominoes

... And now, time to play!

It takes two to play.

- Give each player six dominoes
- Place the rest of the dominoes upside-down at the centre of the table
- The youngest player starts by placing a domino on the table
- Each player takes turns placing matching dominoes. A matching domino is one that has the same image as the one on the table: a banana goes with a banana!
- Use Binoo like a joker: he fits with any image
- When a player's dominoes don't match those on the table, he or she must pick up a domino in the pile until one fits
- The first player to place all his dominoes wins. If none of the players place all of their dominoes, the one with lowest number of dominoes left wins.
